

Section A

Q.1 A. Gum

Q.2 A. Skin

Q.3. A. Summer monsoon winds.

Q.4. C. B horizon

Q.5. B. Adult stage

Q.6. C. Llama

Q.7. C. Sorting

Q.8. C. Bitter

Q.9. C. Soda water

Q.10 B. Land breeze

Q.11 A. Bulb

Q.12 B. Mercury

Q.13. C. Of a simple pendulum

Q.14 A. ~~B~~ A is moving faster

Q.15 B.

~~Q.16~~ Section B

Q.16 Leguminous crops replenish the soil through a natural process called nitrogen fixation.

Q.17 Topsoil is comparatively porous, soft, and holds enough moisture to complete the necessity of the plant

Q.18. Yeast are microscopic fungi and are single celled. They respire anaerobically.

Q.19 This is done during the hot weather

Q.18 20 Artificial silk ~~smells~~ smells like burning plastic or chemical paper. On the other hand, Pure silk smells like burning hair or feathers.

Q.19.21. No

Q.22. —

Section - C

Q.23. ii Functions of pseudopodia in Amoeba are locomotion and food capture.

Q.24 (i) • Breathing & Smelling

 • Feeding & Drinking
• Grooming & Cooling

(ii) • Thick layer of blubber
• Lightly packed feathers

Q.25 (i) • Extreme water scarcity

• Intense Heat and Evaporation

~~Q.25~~ (ii) — — —

Q.26

(i)

A: Trachea

B: Diaphragm.

(ii) Inhaled air - 21% Oxygen

Q.27 (i) An indicator is a chemical substance that changes its color in the presence of acid or base to depict the basicity, acidity or neutralization of the solution.

Q.28

(i) Salt is an ionic compound produced by the neutralization reaction between an acid and a base.

(ii)

Q.29. damn it, bullying

Q.30

(ii) Speed Calculation.

$$d = 3 \text{ km}$$

$$T = 30 \text{ min} = 0.5 \text{ hours}$$

$$\text{speed} = \frac{3}{0.5} = 6 \text{ km/h.}$$

Q.33

(i) B: Fleece

A: Sheep

(ii) D: Scouring

C: Shearing

(iii) Yarn E:

woolen yarn (wool)

(v) Breed of shawls : Bakharwal sheep

(iv) Use of E : Used for weaving or
knitting---

(vi) sheep, wool, llama, bull.
